

Data Description

The training data is denoted with T whereas the evaluation data is denoted with E. After successfully reading the data in Python, the training data format should be:

EEG-data shape: (1769628, 3)

Trials data shape: (399,)

Labels shape: (399,)

The sampling frequency of EEG data: 250

Classes possible: [0 1], where 0 for left-hand imagination and 1 for right-hand imagination
